Re: Internet Safety for Students

The Cardiff School District prides itself on providing a safe learning environment for its students. An emerging national concern is the inappropriate use of the Internet by students. This problem has the potential to be harmful, and we ask your support in assisting us with this challenge.

Across the nation, schools have seen an increase in negative student behavior as a result of messages written using electronic technology, posted to popular social media websites. Many of the social media websites contain instant messaging components that allow students to chat with other students and post statements that ordinarily would not be said in a face-to-face conversation.

Unfortunately, some of these websites are being used by child predators, “cyber bullies,” and con artists. Unfortunately, some students use the sites to participate in online bullying or to threaten harm to other students. The so-called “cyber bullies,” mostly children between the ages of 9 and 14, use the anonymity of the web to hurt others without witnessing the consequences. Students who are bullied online sometimes do not report these occurrences for fear that they will be barred from using the Internet.

Outside of our schools, there have been instances of adults posing as youths and gaining access to student chat rooms. In some cases, these contacts have led to tragedy. Some unsuspecting students post enough personal information that predators are able to locate students’ home or school addresses, thereby becoming easy targets for predators.

The Cardiff School District has blocked the use of these social networking sites from our school computers. We will continue to block objectionable material as we deem appropriate. Parents should be aware of what their children are writing on the Internet and what others are posting in reply. These social networking websites are public domain, and some of the contents posted there can be seen by anyone who has Internet access. If you choose to do so, you may investigate the sites by personally logging on to the sites. The services are free, and users may register using an e-mail address. Once you have registered, you can search by name and e-mail address to see if your child is registered. You can narrow the search result by entering the name of your city. You will be able to view the kinds of personal information, messages, diaries, and photographs that students post to this website.

We encourage you to talk to your child about the potential danger of the Internet. Ask if they have an account on any social media website. If your child is using such a site with your permission, you

Inspiring a love of learning

may want to review his or her profile to ensure that no personal and identifiable information has been posted.

We also encourage you to establish rules and guidelines to ensure the safety of your child while on the Internet. Some websites offer parental or family guidance for Internet safety; for example:

www.connectsafely.org

www.webwisekids.org

The Cardiff School District will continue to provide Internet security within our schools. It is important that parents also monitor Internet use at home.

Thank you for your support and cooperation in keeping our students safe. If you have any questions or would like more information, please feel free to contact our District Technology Coordinator.
